Experience

Frontend Developer and Automation Expert Freelancer: *(2023 - Current)*

- Developed portfolio websites for Usama Labs and Saeed Ijaz using **Next.js, GSAP, Framer Motion**, and **ShadCN.**
- Built an automatic test generation web application for efficient and customizable test creation.

- Created a Python-based GUI for an **automatic form-filling system** to automate repetitive data entry tasks.
- Developed a **random password generator** web app in **Next.js** for secure password creation.
- Implemented front-end automation tasks, including code minification, automated testing, and build optimizations.
- Designed and developed responsive, user-friendly web interfaces focused on modern **UI/UX** trends.

Graphic Design: *(Nov 2023 - Aug 2024)*

- Freelanced as a graphic designer for **Measure Tech** in Chatsworth, USA, creating various posters to enhance the visibility and marketing of their mechanical equipment.
- Freelanced as a graphic designer for **Vicekeeper** and **CareZone** in Dubai, creating compelling social media graphics, logos, and branding materials using **Adobe Photoshop.**
- Developed vector-based illustrations and scalable designs for branding, packaging, and digital media using **Adobe Illustrator**.
- Edited and retouched images in Photoshop, optimizing them for web and print.
- Created marketing collateral, including flyers, brochures, and posters, utilizing **Adobe Illustrator** for high-resolution designs.
- Produced and edited videos in **Adobe Premiere Pro**, ensuring smooth transitions and optimized storytelling.
- Applied color correction, audio syncing, and special effects in **Premiere Pro** to create engaging video content.
